CAPABILITY STATEMENT

Ivory Technology Inc.

Cloud migration · Site reliability · DevSecOps · Datadog observability

> Ivory Technology is a Montréal cloud consultancy. We help organisations move to Azure and AWS, keep business-critical platforms reliable, and get real value from Datadog, from architecture through to day-to-day platform ownership. Every engagement is led by a certified senior architect.

WHAT WE DO

Cloud migration & architecture

Assessment and migration waves, Azure and AWS landing zones as code, network and identity design, cost-aware architecture.

Azure · AWS · Terraform · Entra ID

Site reliability engineering

SLOs and error budgets, incident response, on-call design, capacity planning and automation for business-critical systems.

SLOs · on-call · runbooks

DevSecOps & platform engineering

CI/CD pipelines, infrastructure as code and security guardrails built into delivery from the first commit.

CI/CD · IaC · policy as code

Observability with Datadog

Datadog architecture, rollout and platform ownership: dashboards, alerting people trust, APM, logs and cost control.

APM · logs · monitors · cost

SELECTED WORK

Major Québec institutional investor · Datadog architecture and platform ownership; SRE practices for business-critical systems.

Greater Montréal public transit operator · Infrastructure and DevSecOps for operational platforms.

Global eyewear group subsidiary · Azure infrastructure and DevSecOps for a fast-moving product team.

HOW WE WORK

- Project mandates or ongoing capacity, contracted directly or through your agency
- Managed services for Datadog and cloud platforms after go-live
- Incorporated in Québec (Ivory Technology Inc.), invoicing in CAD
- Based in Montréal; remote or hybrid across Canada
